Google Scholar a SFX

The image shows a browser window with Google Scholar search results for "superconducting polymers". The top result is "Magnetic properties of the superconducting polymer (SN)_x" by R.H. Dee, J.F. Carolan, and B.G. Turrell, published in Physical Review B 22, 174 (1980). Below the search results, there is a sidebar with navigation options like "Full Text", "Library Hold", and "Go to Free".

The main content area displays the article page from the Physical Review Online Archive. The title is "Magnetic properties of the superconducting polymers (SN)_x and (SNBr_{0.4})_x". The authors listed are R. H. Dee*, J. F. Carolan, and B. G. Turrell, from the Department of Physics, University of British Columbia, and R. L. Greene from IBM Research Laboratory, San Jose, California. The article was received on 16 January 1980. The abstract states: "The magnetizations of the superconducting sulfur nitrogen polymer (SN)_x and its brominated modification, (SNBr_{0.4})_x, have been studied as a function of magnetic field and temperature. There is anisotropy in the magnetization observed in both materials. However, (SNBr_{0.4})_x behaves more like a bulk superconductor than (SN)_x does, indicating stronger interfiber

At the bottom of the article page, there is a logo for S.F.X (SFX) and a note: "Hosted Contact © 2005 Powered by SFX © 2005 by EX LIBRIS (USA) Inc."
