

ROZŠÍRENIE MOŽNOSTI VEDECKÉHO SKÚMANIA – KNIHY VO WEB OF SCIENCE

Enikő Tóth Szász, Customer Education Specialist

Book Citation Index (BKCI)

Odborná komunikácia má mnoho foriem a táto škála sa navyšuje v rámci tak širokého zdroja, akým je internet.

Avšak primárnym spôsobom šírenia vedeckých prác a výsledkov výskumov je stále použitie konferenčných zborníkov, časopisov a kníh.

Prečo aj knihy?

Vedecké knihy väčšinou poskytujú celkovú komplexnú, hlbšiu analýzu danej témy, než zborníky alebo časopisy.

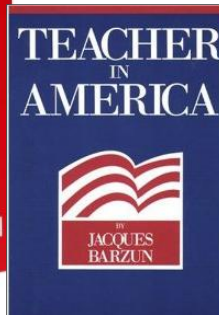

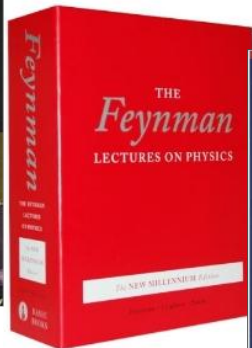

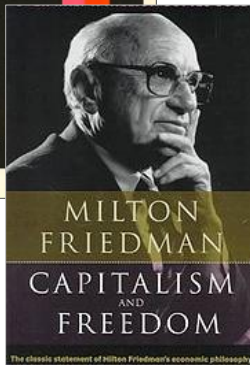

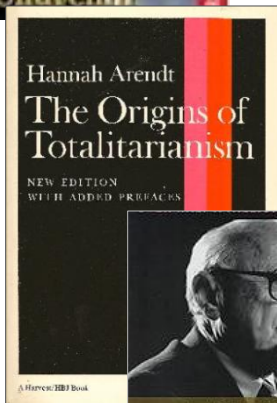

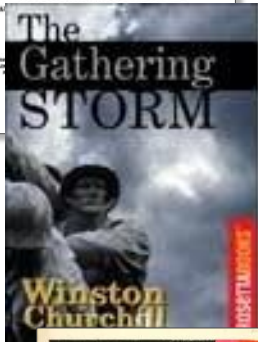

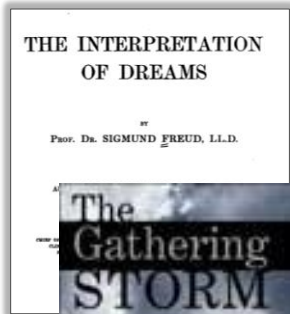

Z tohto dôvodu budú knihy aj naďalej zastupovať nesmierne dôležité miesto v rámci obrovského sveta odbornej literatúry.

V mnoho vedeckých oboroch je kniha vnímaná ako zásadný pre akademický postup, hlavne v oboru humanitných vied.

Vedecké knihy sú v mnoho ohľadoch neoddeliteľnou súčasťou vyššieho vzdelávania.

Odborné knihy

Web of Science – vplyv odborných kníh sa môže dramaticky líšiť.

Niektoré knihy sú milníkmi vo vedeckej literatúre. Poznáme ich niekoľko v histórii, psychológii, ekonómii, fyzike apod.

Odborné knihy

Web of Science – vplyv odborných kníh

Citovaný viac než 3 000krát, len anglická verzia.

Abstract: This chapter argues against the recent crystallization of "contentions politics" as the anchoring concept for the study of collective action on the grounds that it is overly restrictive, foreclosing consideration and analysis of much social movement activity not tied directly to government or the state and which thus falls beyond the bailiwick of the political arena. The problematic character of the contentious politics frame is discussed and illustrated both empirically and conceptually, and a more inclusive and elastic conceptualization is proposed and elaborated, one that conceives of movements broadly as collective challenges to systems of authority. This alternative conceptualization includes collective challenges within and to institutional, organizational, and cultural domains other than just the state or the polity. Not only are direct challenges to authorities included, but also movements that challenge authorities indirectly either through covert means, as in the case of terrorist movements, or by exiting the system, as in the case of separatist and communal movements and other-worldly religious "cults."
