# Markedness (2,113 words)

[Tobin, Yishai](#)

This entry summarizes the concept of 'markedness' originally postulated for the new science of phonology, first discussed by Count Nikolai Trubetzkoy (1931a; 1931b; 1939) and Roman Jakobson (1929; 1931a; 1931b; 1936) of the **Prague** School at the International Congress of Linguistics in the Hague in 1928. The theoretical and methodological implications of phonology and markedness have become the subject of a vast literature (Vachek 1964; Waugh 1976; Sangster 1982; Viel 1984; Liberman 2001; Tobin 2007). Markeness has been adopted and adapted for all levels of language by most, if not all, twentieth century linguistic theories, including transformational-generative grammar (Kean 1980; Belletti et al. 1981; Eckman et al. 1986; Tomić 1989).

# Ablaut (Apophony, Gradation)<sup>(1,877 words)</sup>

Melanie Malzahn

## 1. Definition

Gradation is a morphologically induced vowel alternation also called *apophony* (from Ancient Greek *apophōnē*) or *ablaut* (a German term based on the term *Umlaut*, a somewhat similar phenomenon). In Proto-Indo-European (PIE), all roots included a single vowel that might undergo gradation; this was also true for most athematic derivational suffixes (= those that did not end in a [thematic vowel](#)), and also for some inflectional suffixes. Thus gradation could show up in both derivation and inflection. PIE had three ablaut grades, *full grade* (with *e* and *o*), *zero-grade* (no ablaut vowel), and *lengthened grade* (with *ē* and *ō*). Some scholars assume that a similar ablaut *a/zero/ā* existed as well (most notably Szemerényi 1990:91). It seems that at least in PIE gradation in a derivational suffix depended on gradation in the root and inflectional suffix: a zero grade in a derivational suffix was not allowed if both the root and the inflectional suffix (= ending) were zero, and an *e*-grade in a derivational suffix was not allowed if either the root or the inflectional suffix was in the *e*-grade.

In general, gradation played an important role in PIE morphology and continued to do so in Ancient Greek, but to a lesser extent. Note that one has to distinguish between such morphologically induced ablaut grades and sequences that just look like ablaut grades on the surface but were actually changes induced by phonological processes. As Greek developed, such phonological processes sometimes changed old ablaut patterns, leading speakers to create new patterns or to level those that were inherited.

## KEY JUDGMENTS

The war with Iran is the almost single preoccupation of the Saddam Husayn regime and is the principal determinant of Iraqi foreign and domestic policy. Saddam is locked in a war of attrition, the duration of which depends on a regime in Tehran that espouses Saddam's overthrow as a religious duty. We do not expect the war to end soon. The Iranians—more importantly, Khomeini—have given little indication that they are willing to negotiate a settlement to the conflict.

We believe Saddam will remain in power for the two-year period of this Estimate, but in our judgment his regime has become more brittle. It is more narrowly based on family and tribal ties and more dependent on fear as an instrument of control than it was when the war began.

Iraq retains few concrete war aims beyond extricating itself with the least possible cost. Baghdad abandoned its goal of destabilizing the Khomeini regime early in the war. It adopted a defensive military strategy, thereby forfeiting the ability to control the scope, direction, and duration of the conflict.

Chances of a decisive Iranian military victory during the period of this Estimate are remote. Iran's last two offensives failed at a cost of some 25,000 casualties. Iranian efforts have suffered from poor planning and coordination, inaccurate intelligence, and inadequate air

### 1. Theozentrisches Himmelsbild

Als H. wird im Christentum ein jenseits der irdischen Welt liegender, transzendenter Ort bezeichnet, der als Wohnstätte Gottes, der Engel, der Heiligen und der mit ewigem Leben belohnten Gläubigen gilt ([Jenseits](#)). Während der gesamten Nz. blieb in der christl. Frömmigkeit ([Frömmigkeitskulturen](#)) und [Theologie](#) die ma. Ansicht erhalten, nach der sich das Wesen des H. theozentrisch beschreiben lässt: Im H. begegnen die Seligen Gott, den sie schauen und lobpreisen. Die Reformatoren blieben dieser Sicht verpflichtet; so Johannes Calvin: »Im Paradies sein und bei Gott leben bedeutet nicht, miteinander zu sprechen und einander zuzuhören, sondern allein, Gott zu genießen, sein Wohlwollen zu spüren und in ihm zu ruhen« [\[3\]](#). Zugespitzt formulierte der Jansenist Pierre Nicole: »Der Mensch ist geschaffen, um in ewiger Einsamkeit mit Gott allein zu leben« (franz. *solitude éternelle avec Dieu seul* [\[5\]](#); [Jansenismus](#)). Der Puritanertheologe Richard Baxter konnte sich um die Mitte des 17. Jh.s das ewige Leben nur als Feier eines ewigen Gottesdienstes vorstellen. Werden die Seligen also Flügel bekommen und »rittlings auf einer Wolke sitzen und Halleluja Halleluja Halleluja singen«? - so Sören Kierkegaard 1855 auf seinem Sterbebett. Dieses theozentrische H.-Bild sah sich in der Nz. mehreren Herausforderungen ausgesetzt.

Das Thema spiegelt sich auch in Goethes Roman *Die Leiden des jungen Werthers* (1774): Nach herkömmlicher Vorstellung darf es die Liebe zwischen dem unverheirateten jungen Werther und der unglücklich verheirateten Charlotte nicht geben. Nach seinem Freitod will er im Jenseits warten, bis ihm Charlotte nachfolgt, um die Ewigkeit in ihren Armen zu verbringen. Eine Beschreibung des Paradieses der Liebenden liefert Novalis im *Lied der Toten* (1800): »Leiser Wünsche süßes Plaudern/ Hören wir allein, und schauen/ Immerdar in selge Augen, / Schmecken nichts als Mund und Kuss.«

### 3. Lokalisierung und Dynamisierung

Eine zweite Herausforderung bezog sich auf die Lokalisierung des H., wurde doch die ma. Verortung des H. jenseits eines das Weltall umspannenden Firmaments durch die nzl. astronomische Forschung unmöglich (vgl. [Astronomie](#); [Kosmos](#)). Die Theologie verzichtete deshalb zumeist auf eine Lokalisierung, jedoch wurde auch die Meinung vertreten, der H. befinde sich innerhalb des geschaffenen Universums, vielleicht »unermesslich weit entfernt vom Sonnensystem«, so Jonathan Edwards im 18. Jh. [4]. Nach dem »vorkritischen« Immanuel Kant bleibt die [Seele](#) nach dem Tod des Leibes nicht an die Erde gebunden, sondern schwingt sich zu anderen [Planeten](#) auf, wo sie ihr ewiges Leben verbringen wird (*Allgemeine Naturgeschichte und Theorie des Himmels*, 1755). Geläufig war auch die Ansicht, dass der H. nach dem Jüngsten Gericht mit einer erneuerten

Article Table of ContentsConstantinople Heraclius (610-641), who acceded on the death of Phocas, would be another emperor who tightened the structures of the Empire and its society anew. And he it was (probably more so than his grandson Constans II (641–668)) who undertook a drastic administrative reorganization: the division of the Empire into military provinces, so-called *themata* or 'themes'. The actual meaning of the word *thema* is disputed. It may have meant a 'sphere of operations' for particular army divisions that were transferred to Asia Minor in respo...

## Foreign Law Guide

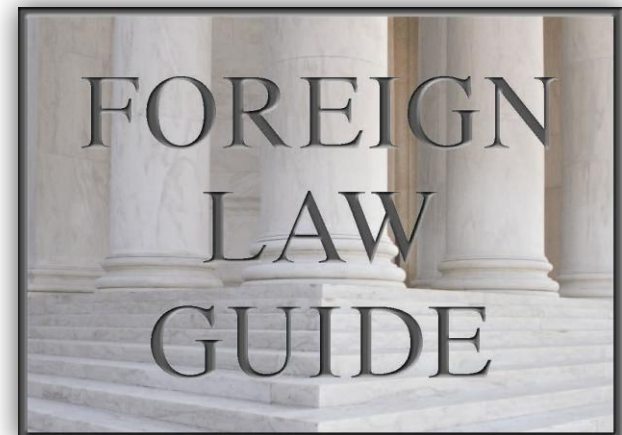

BRILL

### Scope

- The *Foreign Law Guide (FLG)* is an online only database containing information on sources of foreign law in over 170 jurisdictions.
- Snapshots of the country's legal history, judicial and legislative systems, proceeding to local sources of legal information, internet sources, and major publications.

### Features & benefits

- An ongoing reference to over 300 works that are indexed frequently and designated "Materials Indexed."

The Foreign Law Guide (FLG) is a well-known resource for librarians, researchers, law students, and practitioners interested in foreign and comparative law. The print publication began in the 1990s and moved to the web in 2000. During the life of FLG, it has been under the editorial direction and leadership of Thomas Reynolds and Arturo Flores. In 2012, Brill acquired FLG and is now launching it on a new platform with improved content organization and structure, upgraded search and browsing functionality, and streamlined and reorganized subject headings. FLG will develop and improve as the new General Editor and a team of global experts continues to edit and update the content. If you have suggestions about content, please contact Marci Hoffman, [mhoffman@law.berkeley.edu](mailto:mhoffman@law.berkeley.edu).

## How to Use Foreign Law Guide

Experienced users of FLG will note a number of improvements on the new platform. For now, browsing continues to be the best way to access content. Content has been organized to make it more accessible. Each country has a 'main page' where you will find information on the government and legal system, primary sources of law, other print and online sources that are useful, and laws of the country arranged by subject. The index of laws by subject has been refined to standardize terms and increase usability. Similar terms and concepts have been merged together into single headings and cross references have been eliminated. If a subject term is not included in the list, try looking for a broader / related term or try conducting a simple keyword search.

*Example:* "Agriculture and Rural Development" is no longer a subject heading. The content has been incorporated under the broader heading of "Construction, Development, Planning & Property." The content has been tagged with the keywords "agriculture" and "rural development". You may browse the subject index to locate the new broader heading or do a simple keyword search for "agriculture."

## Browsing

You can browse FLG by Country or by Subject. At present, browsing is the recommended method for locating

### CHAPTER I BUSINESS IS GLOBAL, AND SO IS THE LEGAL PROFESSION

The proliferation of global, regional and bilateral trade agreements (many of which cover legal services, among others) and investment agreements provide the primary framework for the private international law of business and investment, and demonstrates the growing importance to each of our economies of bilateral and multilateral disciplines. Trade-flow statistics demonstrate the stark reality of our increasingly borderless world by highlighting the extent to which business is globalized. For instance, in 2010, the United States exported \$2.5 trillion in goods and services, and imported \$2.835 trillion<sup>45</sup>. In the same year, there were approxi-
