LIBRARY SERVICES PLATFORMS

- **Library Services Platforms** is becoming the accepted term for a 'next generation' of library systems that were also known as Unified Resource Management (URM) systems. **They provide capabilities to manage print and electronic resources in a single (unified) system and consequently replace conventional Library Management Systems (LMS/ILS) and Electronic Resource Management (ERM) systems.**

CHANGING TIMES – THE UK

- 2008: —Now is not the time for new LMS procurements
- 2012: —It is obvious that we are at the tipping point for a dramatic change in the area of library automation systems
- 2015: 15% of UK Higher education Institutions have already decided to move to a library services platform Library management system to library services platform.

Market share report: Academic Libraries in United Kingdom

These graphs indicate what automation systems are used by Academic libraries in based on information recorded in the libraries.org database. Keep in mind that libraries.org may not include all the libraries that use any given product.

TIME FOR A MOVE?

Percent of libraries considering switching to a new system

THINGS TO THINK OF BEFORE BUYING LSP

- Cloud based – preferably multitenant SaaS
- Has a Knowledgebase
- Use accepted standards
- Staff workload
-much much more

SATISFACTION LEVEL

WORLD WIDE LSP

GLOBAL VENDOR OVERVIEW

	ProQuest/ Exlibris	Innovative	SirsiDynix	OCLC	Koha
Integrated Print and E workflows	X	X	X	X	
Interoperability (API's)	X	X	X	X	X
Integrated discovery	X	x		X	
Multitenant SaaS	X	coming 2016	X	X	X
Knowledgebase	X	coming 2016		X	
Analytics	X	X	X	X	X

LOCAL LMS SYSTEMS

SVOP Ltd.
DAWINCI

SYSTEMATIC

The logo for KP-SYS consists of a stylized blue icon on the left, resembling a book or a document with a checkmark, followed by the text "KP-SYS" in a blue, sans-serif font.

KP-SYS

Knihovnám a lidem

The logo for Tritius features a blue speech bubble icon with three horizontal lines inside, followed by the text "Tritius" in a white, sans-serif font on a dark blue background.

Tritius

LOCAL LMS

	Dawinci	ARL	Kpsys	Tritius	Cicero
Cataloguing	X	X	X	X	X
Circulation	X	X	X	X	X
User registration	X	X	X	X	
Aquisition	X	X	X	X	X
Finance	X	X	X	X	

WHERE IS IT INSTALLED?

Is your service SaaS or installed locally

significant investment of time required from library

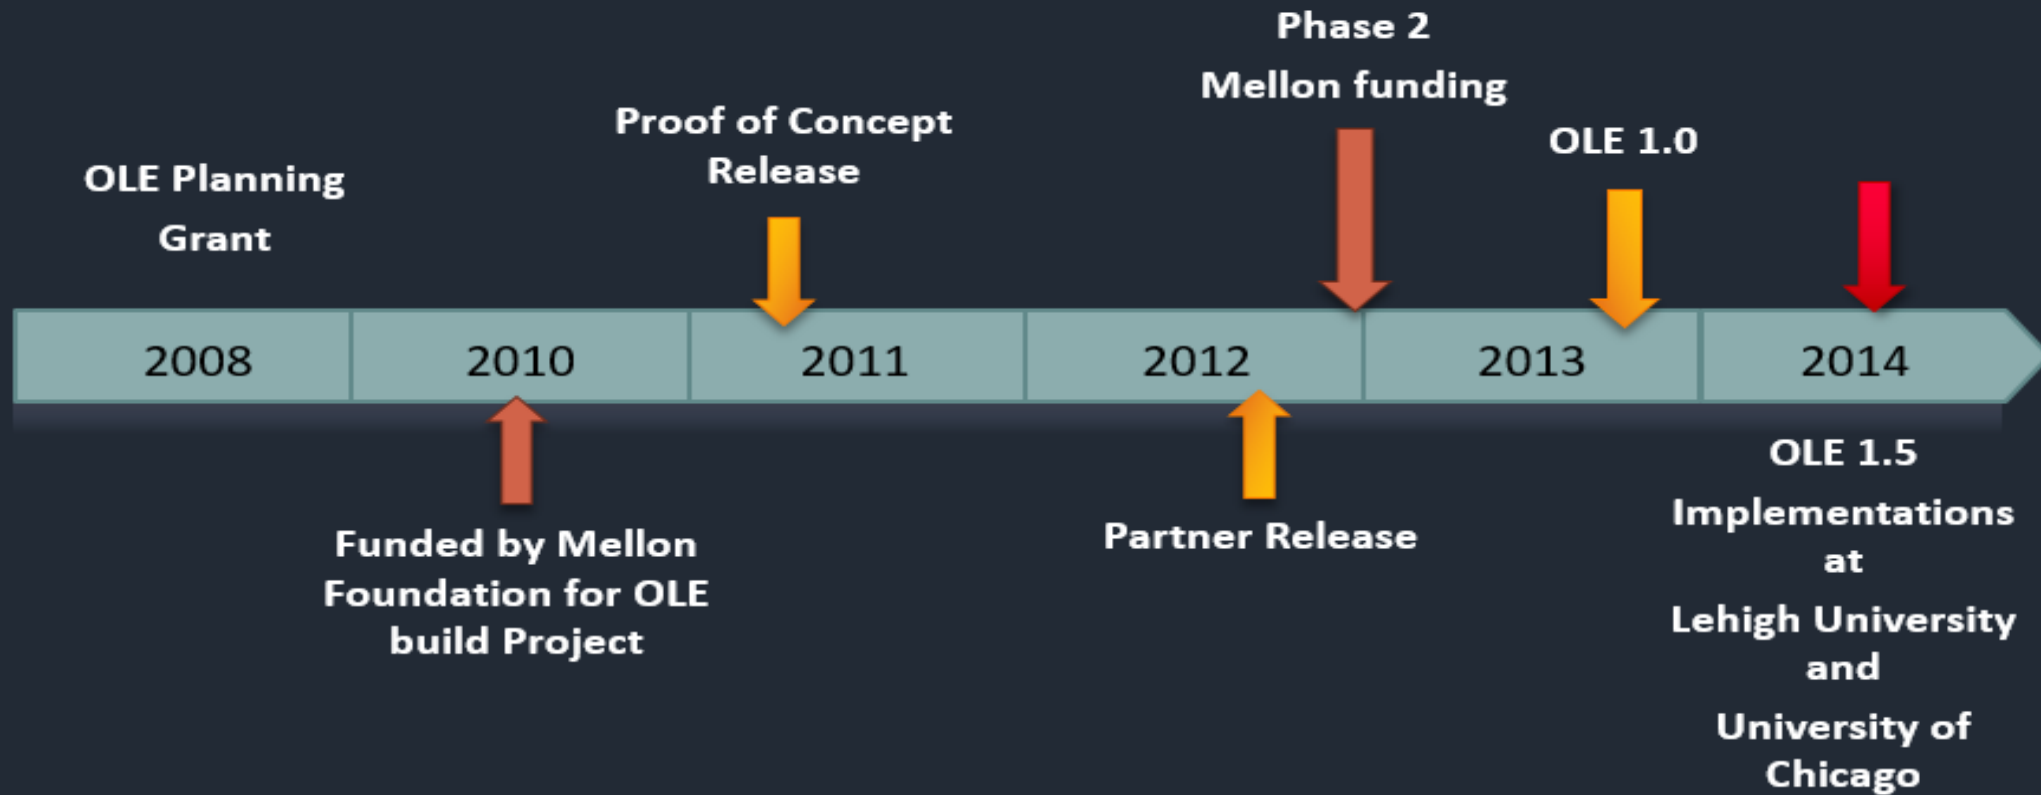

Most implementation and maintenance done by vendor

DOES THE LMS TAIL STILL WAG THE DOG?

- The conventional library management system/integrated library system (LMS/ILS) has only ever managed a part of the business of the library. **So doesn't it seem rather odd that a solution can only be deemed a library services platform (LSP) if it has features to manage the cataloguing, acquisition and circulation of print material?** Perhaps we need to shift our point of view to that of the user. If they use the ProQuest Summon or EBSCO discovery services they will typically be able to find print materials and electronic resources integrated into the same user interface. If they find a print book they will check it out using a self service terminal provided by a vendor like Bibliotheca. Of course this oversimplifies the situation but it does suggest that the LMS/ILS tail still wags the library platform dog.

DO WE STILL NEED THE COMPLEXITY?

- However that will still leave gaps in the ecosystem that will be filled by solutions from ISVs. These cloud based third party solutions will be much more interoperable than solutions today. They will be part of what Gartner described above as: “a more federated, loosely coupled ERP environment.” That means that LSP providers will have to raise their game in terms of opening up their platforms to ISVs.

CONCLUSION

**KEEP
CALM
AND
FOCUS ON
USERS**

- Many – very different – solutions
- Interoperability is key
- Do you really, really need everything?

THANK YOU
