

### RefWorks

As online research management and bibliography creation service, RefWorks allows you to:

- 1. Create a personal database of your own research
- 2. Organize your research materials into folders and subfolders
- 3. Share your research materials with other users
- 4. Create a bibliography for your research
- 5. Create a bibliography for your research

Who uses RefWorks?

CSA Library School Programme RefWorks v CR

### RefWorks

Attaching objects to your references with your RefWorks Database is as easy as 1, 2, 3.

1. Select the reference you want to attach an object to.
2. Click on the "Attach" button.
3. Select the object you want to attach.

### ATTACHMENT Feature

RefWorks now has the ability to attach and store images and documents with your references. The new feature allows you to attach any document, image, or audio file to your reference. The attachment is stored in the RefWorks database and is accessible to all users who have access to the database.

Benefits:

- Attach any document, image, or audio file to your reference.
- Attachments are stored in the RefWorks database and are accessible to all users who have access to the database.
- Attachments are stored in the RefWorks database and are accessible to all users who have access to the database.

RefWorks
