# E-Journals - Academic OneFile (AONE)

AONE is a multi-disciplinary collection of mostly peer reviewed journals covering over 700 subject areas

Contains nearly 13,000 titles, including more than 7,300 peer-reviewed journals and more than 5,000 in full-text

Full-text of the *New York Times* from 1995, *London Times* from 1985

Full NPR archive with audio and transcripts

Video from OR Live

Multiple Gale and third-party reference sets

A well rounded 'discovery' tool

# Why Use Academic OneFile

AONE's superior indexing process makes articles easy to find.

AONE provides unique content that can not be found elsewhere.

AONE will not frustrate students or patrons as we provide more full text with the lowest embargo rate than any other aggregated database.

Cross Searchable with GVRL

Fewer Embargoes and more Active Full Text are our strong points

Using our resources wisely will help the U.S. and the environment

The United States is the world's largest consumer of energy. We use electricity, gas and oil to light and heat our buildings and run our cars. The demand for power is growing. But we may not need to build new power plants or drill for more oil. We can save energy and money by using energy more efficiently. It is to be more efficient.

Did you know that when you leave your video-game console on, it devours more electricity than two refrigerators? Or that compact fluorescent lightbulbs (those funny-looking, twisty bulbs) use 75% less power than traditional lightbulbs? We have the answer, simply by wasting less energy. The ultimate way to get work done.

# GVRL Subject Collections – Some Suggestions...

# *Digital Archives*

## **Gain incomparable insight**

In the past, researchers had to visit libraries' onsite collections to view the primary source material necessary for their studies.

Today, Gale does the traveling - to digitize that same rare content from leading libraries across the globe. Because remote and simultaneous usage are possible online, researchers, faculty and students can access the resources they need 24/7.

- Gale has changed/improved the nature of research and education with *Gale Digital Collections*
- A wealth of rare, formerly inaccessible historical content from the world's most prestigious libraries has been opened up to faculty, researchers and students
- *Gale Digital Collections* represents an extraordinary resource, covering over 500 years of international history
- Large full text searchable Collections show new results
- Purchase of raw data (library becomes owner of data)
- Access to Gale server
- Combination of traditional Library acquisitions to own content
- with modern search technology

*Limit your search by any of the criteria listed below:*

Year(s) of Publication:  (yyyy - yyyy)

Include documents with no known publication date

Subject Area:  All

**Search Tip:** The AND operator searches multiple words or terms within the same article i.e. East India Company

**Use limiters:** year of publication, select work, subject area, language

**Use Fuzzy Search:** Low, Medium, and High

Fuzzy search settings can enhance your search by retrieving near matches on a term or terms

**Use Proximity Operators:** Proximity operators are used between two search terms to indicate that the terms must occur in a record within a specified distance of each other for that record to match

Wn (within) operator - Nn N (near)

## ECCO in Testimonials from Academics

From Professor Rob Hume's (Penn State University, USA):

**A university that does not have ECCO is not a serious player in eighteenth-century British and American studies—in literature or in anything else.**

Any institution giving graduate degrees in eighteenth-century subjects reduces itself to below minor-league status if it does not provide ECCO to its students—and is putting its publishing faculty at a crippling disadvantage.

## ECCO In Testimonials from Academics

*Prof. Erne, Head of the English Department at the University of Geneva/Switzerland about ECCO*

***To have or not to have ECCO is an existential question for any serious student, researcher, or teacher of the eighteenth century. The database provides access, at the click of a mouse, to the holdings of the very best research libraries in the world. Contrary to research libraries, it permits easy searchability, necessitates no time-consuming travel and is accessible twenty-four hours a day. In teaching, it enables professors to use, and students to do independent research on, an exhilarating range of primary documents. As for research, ECCO is simply becoming a sine qua non for scholarship that breaks new ground.***

Lukas Erne, University of Geneva

## Suzy Halimi Présidente de la Société d'Etudes anglo-américaines Professeur à la Sorbonne Nouvelle - Paris III/ France

*ECCO is an excellent database for researchers on the eighteenth century, the period of the Enlightenment. We had a test presentation at the Bibliothèque Nationale de France, in 2006. **All the members of the audience - professors, librarians, lecturers, PhD students - were enthusiastic....**: To be able to use ECCO now in our universities... represents an **undreamt-of advantage**; it saves time and money, and we can consult the information we need, at our own convenience....*

*... the resources offered by ECCO can reach far beyond, to specialists of other disciplines: history, philosophy, religion, law, arts, sciences, medicine, etc. Besides people working not only on Britain, but also on **publications concerning other European countries** at the time - **Spain, France, Italy, Germany, the Netherlands, and so on** - can find here all they need . ECCO is based on a **multi-disciplinary approach**, with loads of texts, maps, plates, illustrations of all kinds....*

*To place this indispensable instrument within the reach of all researchers, at the time of globalization and scientific competition and cooperation, **should be a priority of all libraries and institutions of higher education....** a wonderful help in our work. It is to be hoped that others will follow suit and that all French researchers on the eighteenth century , whatever their discipline, will have access to the same facilities in the near future.*

## **Eighteenth Century Collections Online Part II: New Editions**

ECCO Part II includes more than 6.4 million new pages of content and 46,000 new titles with particular emphasis on social sciences and fine arts.

- Includes especially rare Books not available at publication of ECCO I
- Material from additional libraries

§ The data is categorised into the same modules/subject areas as ECCO.

§ The material included is that which has been filmed since 2002, previously withheld for conservation, previously too fragile to film, too remote or not yet discovered when the first part was released

§ This *New Editions* will also provide a new user interface with increased functionality
