Only textual responses from English speaking participants are listed below.

What were you pleased most by?

- Its perferct organization and eminent key-speakers.
- Evaluation of scientific work session.

What made you upset and what do you think should be avoided?

- Meals, I think. The rest was perfect.

Papers (topics) & speakers suggestions for the next year

- Information Literacy is the most "trendy" topic now. And University of Sheffield (UK) is the European leader in this domain. I suggest to invite Sheila Webber: her blog - http://information-literacy.blogspot.com/.
- The second very urgent case is a preservation of e-resources. Currently there are at least two initiatives (LOCKSS and Portico) which are being developped, but they still aren't known too widely in our part of Europe. So, why not to present them?
