SIGLE

System for Information on Grey Literature in Europe

- a European database of bibliographic records in grey literature
- Produced by 7-15 European member organizations
- 1980 → 2005
- Content : Multidisciplinary
- Hosts : STN International and Silverplatter/Ovid

OpenSIGLE

- December 2007
- Provider: INIST-CNRS
- 700 000 records
- Open Access platform
- Open Source SW: DSpace
- Minimal development
- No new records - exception GreyNet conference series

OpenSIGLE

- OpenDOAR (Directory of Open Access Repositories) 11/2009
- WorldWideScience.org 11/2008
- Google a Google Scholar 6/2008
- Between 2009 and 2010 tripled visits
- Problem = separate information about partners, subject headings and document delivery

OpenSIGLE

The screenshot shows the OpenSIGLE website interface. At the top, the title 'OPENSIGLE' is displayed in large white letters on a blue background, with the subtitle 'SYSTEM FOR INFORMATION ON GREY LITERATURE IN EUROPE' below it. A navigation bar on the right contains the link 'OpenSIGLE at INIST >'. The main content area is divided into several sections: 'OpenSIGLE' (introduction), 'Search' (with a search box and 'Go' button), 'Communities in OpenSIGLE' (with a list of communities), and 'Languages' (with a list of languages). A sidebar on the left contains a search box, a 'Home' link, and sections for 'Browse' (Home, Communities & Collections, Titles, Authors, By Date) and 'Other' (Help, About OpenSIGLE, Full subject category list). Annotations include a box labeled 'SIGLE classif.' pointing to the 'Full subject category list' link, and a box labeled 'About, partners, document supply' pointing to the 'About OpenSIGLE' link. The right sidebar contains three sections: 'GL13' (Call for Papers), 'GL12' (OpenSIGLE and GreyNet were at the Grey Literature Conference GL12, Prague, December 6-7, 2010), and 'EAGLE' (OpenSIGLE combines the resources of major European information and document supply centres who joined in an association known as EAGLE).

supply centres who joined in an
association known as EAGLE :
European Association for Grey
Literature Exploitation.
Each centre was responsible for
collecting grey literature
produced in its own country and
for providing details of it

Why change ?

- Software and user interface:
 - Technical performance at its limits (indexing, ..., upload of GL preprints)
 - Features requested by users (export records)
- Content:
 - Improve information on access to the document
 - Add new records
 - Add links to full text

OpenGrey

- 17. 6. 2011
- Name and design
- Software
 - Exalead – search engine for the database
 - In-house developments using php and MySQL software for the user interface
- Persistent identifier
 - Each record in OpenGrey is identified by a unique identifier, the **handle**

What's new?

- User interface and administration
 - Technical performance improved (re-indexing)
 - Facetted search
 - Information how to obtain the document more prominent
 - Possibility to export records in XML and Zotero
 - Export search results as RSS file
- Content
 - Add records from 2005 onwards from current partners
