- Refer information to colleagues
- Bookmark specific references or pages

Kluwer Online eReference Works - Features

<http://reference.kluweronline.com>

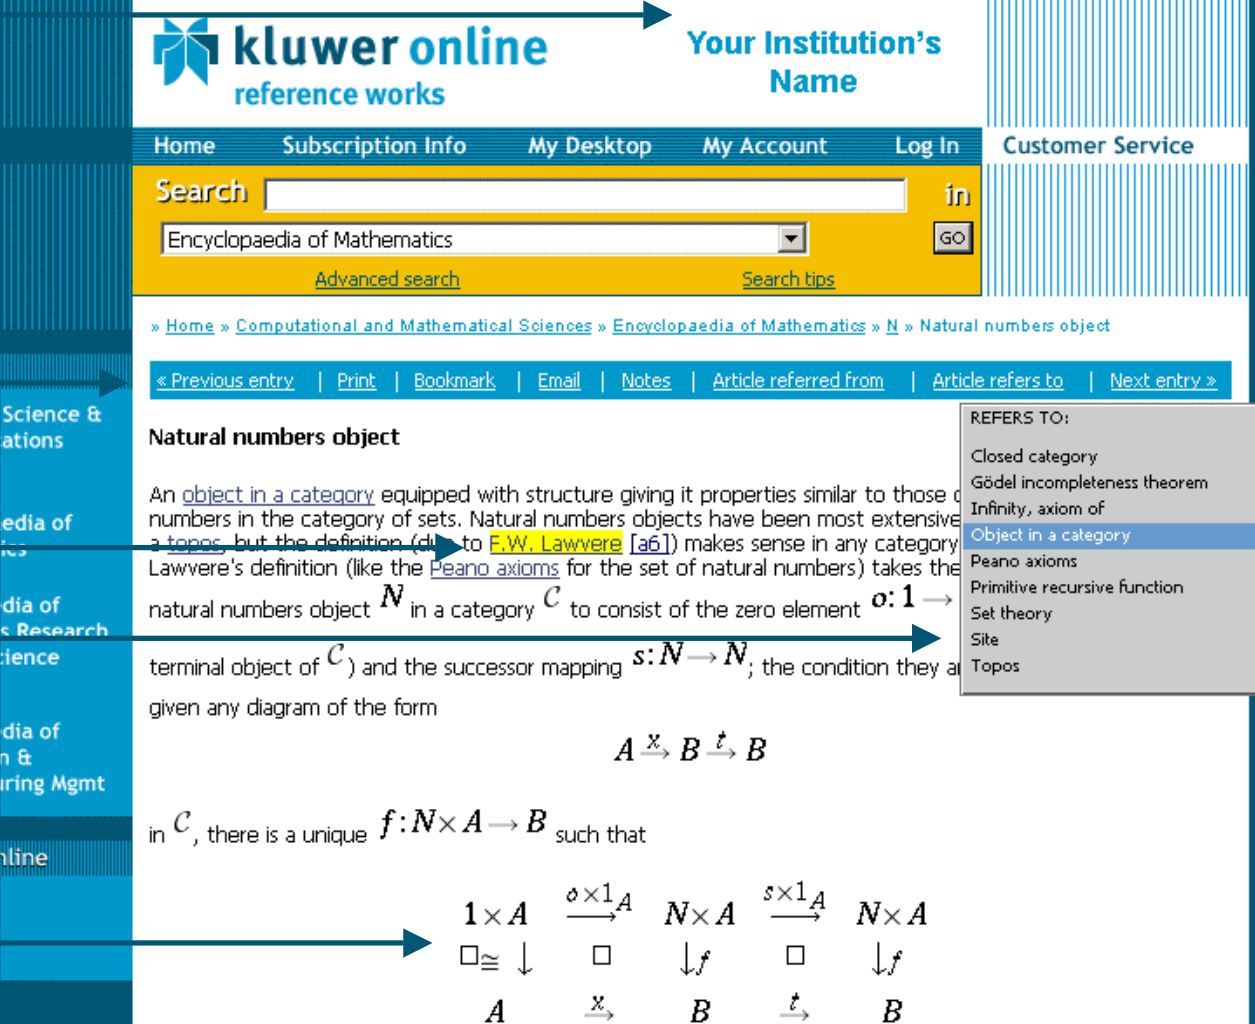

Co-branded with your institution's name

Functionality toolbar allows individuals to customize the platform with their notes, searches, etc.

Highlighted items indicate index terms

Powerful "Refers to" and "Referred from" links allow for non-linear research that follows a subject/topic

All entries are rendered in HTML, equations are rendered as images

The screenshot displays the Kluwer Online interface for the article "Natural numbers object". The top navigation bar includes "Home", "Subscription Info", "My Desktop", "My Account", and "Log In". A search bar contains "Encyclopaedia of Mathematics" with a "GO" button. The breadcrumb trail reads: "Home » Computational and Mathematical Sciences » Encyclopaedia of Mathematics » N » Natural numbers object".

The article title is "Natural numbers object". The text describes an object in a category equipped with structure similar to natural numbers. A highlighted reference is "F.W. Lawvere [a61]". The text mentions the Peano axioms and the natural numbers object N in a category C .

The "REFERS TO" dropdown menu lists the following items:

- Closed category
- Gödel incompleteness theorem
- Infinity, axiom of
- Object in a category
- Peano axioms
- Primitive recursive function
- Set theory
- Site
- Topos

The diagram shows a commutative square:

$$\begin{array}{ccccc}
 1 \times A & \xrightarrow{\sigma \times 1_A} & N \times A & \xrightarrow{s \times 1_A} & N \times A \\
 \square \cong \downarrow & & \square & & \square \\
 A & \xrightarrow{x} & B & \xrightarrow{t} & B
 \end{array}$$
