

Trends in Academic and Professional Online Information Services

Dr. Peter Jacso, Professor

Department of Information and Computer Sciences
University of Hawaii, USA

May 22, 2007

25 years ago they reigned supreme

Then came the free Web-born search services from the mid-1990s

YAHOO!

altavista™

fast

Google™

msn.

Live Search

SCIRUS
for scientific information only

excite™

LookSmart®

HighBeam™
RESEARCH

Ask™
.com

... and the government agencies, societies, publishers & their digital facilitators

THE trend

- Bad trend: Worshipping Google, Google This, Google That – the digital personality cult era led by *Nature* magazine's naïve journalists, some naïve academics & some "blahging" groupie bloggers
- Best trend (and my hope): Scholarly & Pro services **will not do** what **Google Scholar** does, (**Google is mostly fine**)
- Diploma mill scholarship at best in Google Scholar & the mantra of "*We don't need no education – we don't need no metadata, we don't need no Boolean mind control*" – and the consequences

What is true

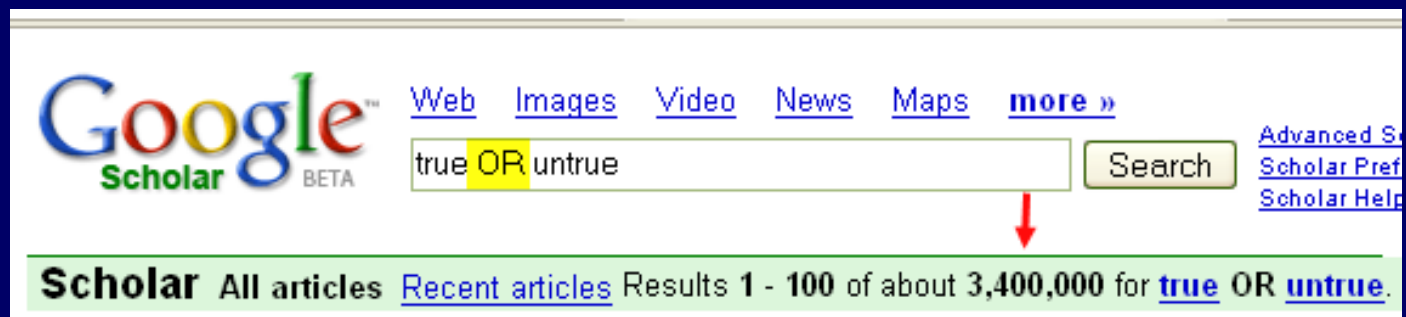

What is untrue

The Boolean
untruth of
Google
Scholar

And what is Google's truth - Use your common sense and not Google Scholar which shows only the first 1,000 "hits" if you doubt, the rest at best is in the domain of 1001 Arabian Nights

More than 3 times as many records for 2006-2007 than for 2005-2007? GS should take that first grade math class again, and stop bluffing its absurd hit counts and citedness counts. You will loose face dispensing such nonsense.

A screenshot of the Google Scholar search interface. The search bar contains the text "2005 - 2007". A red arrow points to the "2005" input field. Below the search bar, the text "Scholar All articles Recent articles Results 1 - 100 of about 225,000. (0.11 seconds)" is displayed.

What will be published in 2008?

Nobody can be so recent as Google Scholar

The screenshot shows the Google Scholar interface. At the top left is the Google Scholar logo with 'BETA' underneath. To the right are navigation links for 'Web', 'Images', 'Video', 'News', 'Maps', and 'more »'. Below these is a search bar containing the text '2008 - 2008' and a 'Search' button. On the far right, there are partial links for 'Advanced Search' and 'Scholar Search'. Below the search bar, a green header bar contains the text 'Scholar All articles Recent articles' and 'Results 1 - 100 of about 1,710'. On the left side, there is a vertical list of author names: 'M Wolff', 'M Rivera', 'E Voest', 'H Panofsky', and 'P Toniolo'. The main content area displays three search results. The first result is 'Blood Levels of Organochlorine Residues and Risk of Breast Cancer - all 8 versions', with authors 'MS Wolff, PG Toniolo, EW Lee, M Rivera, N Dubin' and the year '2008'. It includes a 'Skip Navigation...' link and a list of related links: 'Cited by 435 - Related Articles - Web Search - Resources @ My Library - BL Direct'. The second result is 'Inhibition of Angiogenesis In Vivo by Interleukin 12 - all 5 versions »', with authors 'EE Voest, BM Kenyon, MS O'Reilly, G Truitt, RJ D'...' and the year '2008'. It also includes a 'Skip Navigation...' link and related links: 'Cited by 367 - Related Articles - Web Search - Resources @ My Library - BL Direct - 8'. The third result is 'Atmospheric Turbulence. Models and Methods for Engineering Applications - a...', with authors 'HA Panofsky, JA Dutton' and the year '2008'. It includes a 'Skip Navigation...' link and a related link: 'pdf.aiaa.org'.

scitopia.org

Thirteen Societies. One Site. Superior Results.

Welcome to scitopia.org – 3 million articles, spanning 150 years of science and technology

Scitopia.org is a free federated vertical search that lets you explore the research most cited in scholarly work and patents in a single click.

Brought to you by thirteen of the world's leading science and technology societies, **scitopia.org** searches more than three million documents, including peer-reviewed journal content and conference proceedings. You'll get to the content you need quickly without having to search each individual society's online library.

Scitopia.org, the best place on earth for technology research, will be revealed in June 2007.

1. [Non-injection drug use and Hepatitis C Virus: A systematic review](#). By: Scheinmann, Roberta; Hagan, Holly; Lelutiu-Weinberger, Corina; Stern, Rebecca; Jarlais, Don C. Des; Flom, Peter L.; Strauss, Shiela. *Drug & Alcohol Dependence*, Jun2007, Vol. 89 Issue 1, p1-12, 12p Abstract: Abstract: This systematic review examined the evidence on the prevalence of the Hepatitis C Virus (HCV) in non-injecting drug users (NIDUs) who sniff, smoke or snort drugs such as heroin, cocaine, crack or **methamphetamine**. The search included studies published from January 1989 to January 2006. Twenty-eight eligible studies were identified and the prevalence of HCV in these NIDU populations ranged from 2.3 to 35.3%. There was substantial variation in study focus and in the quality of the NIDU data presented in the studies. The results of our systematic review suggested that there are important gaps in the research of HCV in NIDUs. We identified a problem of study focus; much of the research did not aim to study HCV in users of non-injection drugs. Instead, NIDUs were typically included as a secondary research concern, with a principal focus on the problem of transmission of HCV in IDU populations. Despite methodological issues, HCV prevalence in this population is much higher than in a non-drug using population, even though some IDUs might have inadvertently been included in the NIDU samples. These studies point to a real problem of HCV in NIDU populations, but the causal pathway to infection remains unclear. [Copyright 2007 Elsevier]; DOI: 10.1016/j.drugalcdep.2006.11.014; (AN 24864274)

MetaSearching for Database Selection with a 360° perspective

- Current practice: choose a database then enter your search terms
- The trend: type your search term we show you a score board of databases with the most hits with your words in the title
- Broadcasting query to groups of databases on the subject of search, going beyond one host – 360°
Search

Sweep through search across all the databases – with alpha listing

Profiling the NCSU Library Collection

The image shows the NCSU Libraries website interface. At the top left is the NCSU Libraries logo and a navigation menu with the following items:

- SEARCH THE COLLECTION
- BROWSE SUBJECTS
- SERVICES
- LIBRARY INFORMATION
- COMMUNITY
- NEWS & EVENTS

To the right is a photograph of students studying at a table in a library. Below the photo is the text: **MY LIBRARY:** Library Account | My Course Reserves

The main content area features a dropdown menu labeled "- Most Used -" which is open, showing a list of databases. The "Top 10 Databases" item is highlighted. The list includes:

- Academic Search Premier
- Web of Science
- Business Source Premier
- Google Scholar
- PsycINFO
- LexisNexis
- WorldCat
- ERIC
- Engineering Village 2
- CAB Abstracts

Below the dropdown menu is a "Browse Subjects" section with a grid of subject categories:

Agriculture	Mathematics
Design	Natural Resources
Education	Physical Sciences
Engineering	Social Sciences
Humanities	Textiles
Life Sciences	Veterinary Science
Management	

At the bottom of the page is a "Community" section with an icon of three people.

360 Search (Central Search)

The screenshot displays the '360 Search Demo' web application. At the top, a browser window shows the URL: http://nh9sw2df5c.cs.serialssolutions.com/results?SS_LibHash=NH9SW2DF5C&dbIDList=all%2CPAG%2CEAP%2CACM%2C. The page features a navigation menu with 'Refine Search' and 'New Search' options, and a 'Help' link. A sidebar on the left lists various categories under 'Clustered Results', including 'All Topics (541)', 'Conference (55)', 'University (41)', 'Review (38)', 'Meeting (26)', 'Library (22)', 'Library in Prague (8)', 'Children (21)', 'Congress (18)', 'Exchange, Prague Stock (16)', 'Images (14)', and 'Prague Open (14)'. Below this is a 'Results By Source' section listing 'ACM Digital Library (27)', 'Annual Reviews', and 'BioMedCentral (3)'. The main content area shows search results for the query 'title contains prague', displaying 1-25 of 624 results. The first result is a correction in the 'Journal of Nervous and Mental Disease' (1911, Feb 2003). The second result is 'Prague Feline Congress: pink pages 2 and 3' from the 'Journal of Feline Medicine and Surgery' (June 2007). The third result is a news item from the 'US Fed News Service' regarding a video conference in Prague-Chicago on May 11. The interface includes a 'Sort by' menu (Date, Title, Author, Source) and a 'Filter By' option (Full Text). The bottom of the screen shows a Windows taskbar with the Start button, several open applications (Document1 - Microsoft..., Yahoo! Mail - peterja..., Central Search Result...), and the system tray with the date and time (17:16).

My customized version of PolyMeta metasearch & clustering engine (yes, it is a Hungarian product, but I would like it too if it were Albanian)

The Cited Reference Enhancement Trend

- Eugene Garfield's idea of 1955 realized on a large scale 50 years later
- Web of Science & Scopus rule the waves
- Ebsco, CSA, APA hopped on the bandwagon
- Best digital facilitators do it very well (HighWire Press Atypon, and MetaPress)
- Some publishers do it well

Title: **Trends / Surveys: Online Job Hunting: A Pew Internet Project Data Memo. [Web links]**

Source: *Press Release* (17 Jul 2002):

Language: English

Abstract: Fifty-two million Americans have looked online for information about jobs, and more than 4 million do so on a typical day. Overall, these figures represent a more than 60 percent jump in the number of online job hunters from March 2000 when we first asked about the subject. We found then that 32 million had used the Internet to check out jobs. Moreover, there has been about a 33 percent hike in the daily traffic related to job **searching**. On a typical day in March 2000, about 3 million Internet users were **searching** for job information. These current figures come from a Pew Internet Project survey of 2,259 Internet users that was conducted from 1 March through 19 May 2002. The margin of error is plus or minus two percentage points. Among those who are the most likely to do online searches for jobs: **YOUNG INTERNET USERS BETWEEN THE AGES OF 18 AND 29.** Some 61 percent of them have looked for jobs online, compared to 42 percent of those ages 30-49 and 27 percent of those ages 50-64. **MEN.** Some 50 percent of online men had sought job information, compared to 44 percent of online women. On a typical day, twice as many online men are job hunting as women. **THE UNEMPLOYED.** About 51 percent of those who do not currently have jobs have Internet access. On

Health surveys in the workplace: comparison of postal, email and World Wide Web methods

R. Jones and N. Pitt

Department of Public Health, University of Glasgow UK

Health surveys in the workplace are an important part of epidemiology, needs assessment and health promotion. Since the workplace is changing rapidly with the use of computer networks, we examined the feasibility, validity and cost of health surveys using email and the World Wide Web (WWW). Five hundred systematically sampled university staff in a convenience sample of 10 English universities were surveyed using either email alone, email plus a WWW form or

THE MOTIVATIONAL IMPACT OF TEMPORAL FOCUS: Thinking About the **Future** and the Past

Rachel Karniol

Department of Psychology, Tel Aviv University, Ramat Aviv, Israel

Michael Ross

Department of Psychology, University of Waterloo, Waterloo, Ontario, N2L 3G1 Canada

In this chapter, we consider the degree to which individuals are pulled to behave by their conceptions of the **future**, pushed to act by their recollections of the past, or primarily driven by current exigencies. In examining conceptions of the **future**, we discuss how individuals bridge the present and the **future**, the origin of goals, their impact on behavior and cognition, and the
