e (mathematical constant) [\(Přihládnout ve Wikpedii\)](#)

From Wikipedia, the free encyclopedia

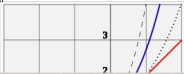

The **mathematical constant** e is the unique **real number** such that the area above the x -axis and below the curve $y=1/x$ for $1 \leq x \leq e$ is exactly 1. It turns out that, consequently, the area for $1 \leq x \leq e^t$ is t . Also, the function e^x has the same value as the **slope of the tangent line**, for all values of x .^[1] More generally, the only functions equal to their own **derivatives** are of the form Ce^x , where C is a constant.^[2] The function e^x so defined is called the **exponential function**, and its **inverse** is the **natural logarithm**, or logarithm to **base** e . The number e is also commonly **defined** as the **base of the natural logarithm** (using an **integral** to define the latter), as the **limit** of a certain **sequence**, or as the sum of a certain **series** (see **alternative characterizations** below).

The number e is one of the most important numbers in mathematics,^[3] alongside the additive and multiplicative identities **0** and **1**, the constant **π** , and the **imaginary unit** i . (All five of these constants together comprise **Euler's identity**.)

The number e is sometimes called **Euler's number** after the **Swiss mathematician Leonhard Euler**. (e is not to be confused with φ – the **Fuler-Mascheroni constant**, sometimes called simply **Euler's constant**.)

The area under the graph $y = 1/x$ is equal to 1 over the interval $1 \leq x \leq e$.

SemantiFind

Stop Searching. Start Finding.

Are you fed up wasting time on endless searches? Most people have to refine their searches several times before finding what they actually want. That's because today's search engines can only search for words, but they can't search for meaning.

SemantiFind enhances your existing search engine experience to save you time and deliver more meaningful results. It eliminates ambiguity, allows you to say things the way you want and helps filter out the noise from your existing search engine. And it does all this while you keep using your search engine of choice.

The Semantic Spotlight

Welcome to the Semantic Spotlight, a resource and meeting point for people interested in semantic search and Web 3.0. This is where members of the SemantiFind team write about topics we consider relevant to improving the way people find information on the web.

Semanti Corp Launches 'Semantic Spotlight'
Bruce Johnson - Sun Nov 02 22:30:40 MST 2008

Hello, and welcome to the inaugural post on Semantic Spotlight. Semantic Spotlight is where you can hear what we, and others, are thinking about all things "semantic search". Each week we will post a handful of articles related to improving the way people find information on the web. [read more...](#)

Finding the stuff you like - over and over again
Burghardt Tenderich - Sun Nov 02 20:53:34 MST 2008

What people are saying...

"SemantiFind's search enhancement technology promises to truly improve the way users search and find the ever-increasing information available on the Web."
Chris Shipley, Executive Producer, DEMO

"SemantiFind has figured out how to enhance Google Search so that it can seem like it's delivering more advanced results."
Dean Takahashi, Venture Beat

"It's a fabulous tool... it's completely changed the way I run searches."
Alec Saunders, Squawk Box

Reunion and *Anthology*

In February 1994, the three surviving Beatles reunited to produce and record additional music for a few of Lennon's home recordings. "Free as a Bird" premiered as part of *The Beatles Anthology* series of television documentaries and was released as a [single](#) in December 1995, with "Real Love" following in March 1996. These songs were also included in the three *Anthology* collections of CDs released in 1995 and 1996, each of which consisted of two CDs of never-before-released Beatles material. [Klaus Voormann](#), who had known The Beatles since their Hamburg days and had previously illustrated the *Revolver* album cover, directed the *Anthology* cover concept. 450,000 copies of *Anthology 1* were sold on its first day of release. In 2000, the compilation album *1* was released, containing almost every number-one single released by the band from 1962 to 1970. The collection sold 3.6 million copies in its first week (selling 3 copies a second) and more than 12 million in three weeks worldwide. The collection also reached number one in the United States and 33 other countries, and had sold 25 million copies by 2005 (about the ninth best selling album of all time).

Recent projects and developments

In the late 1990s, [George Harrison](#) was diagnosed with [lung cancer](#). He succumbed to the disease on 29 November 2001.^[102]

[George Martin](#) and his son [Giles Martin](#) remixed original Beatles recordings to create a soundtrack to accompany [Cirque du Soleil's](#) theatrical production *Love*. The soundtrack album *Love* was released in 2006. In 2007, McCartney and Starr reunited for an interview on *Larry King Live* to discuss their thoughts on the show. Beatles widows [Yoko Ono](#) and [Olivia Harrison](#) also appeared with McCartney and Starr in Las Vegas for the one-year anniversary of *Love*.

Also in 2007, reports circulated^[103] that McCartney was hoping to complete "Now and Then", the third Lennon track the band worked on during the *Anthology* sessions. It would be credited as a "Lennon/McCartney composition" by writing new verses, and reworked by laying down a new drum track recorded by Starr and utilising archival recordings of Harrison's guitar work.

Lawyers for The Beatles sued on 21 March 2008 to prevent the distribution of unreleased recordings purportedly made during [Ringo Starr's](#) first performance with the group in 1962. The dispute between [Apple Corps Ltd.](#) and [Fuego Entertainment Inc.](#) of [Miami Lakes](#) stems from recordings apparently made during a performance at the [Star Club in Hamburg, Germany](#).^[104]

In November 2008, McCartney revealed the existence of a 14-minute experimental recording The Beatles made called "Carnival of Light", which he would like to see released but would require approval from [Ringo Starr](#) and Beatles widows [Yoko Ono](#) and [Olivia Harrison](#).^[105]

The Beatles: Rock Band, a video game in the style of *Rock Band* and based solely on The Beatles, is reportedly in development and scheduled for a release of 9 September, 2009.^[106] On the same day, a long time awaited remastered CDs of the twelve album (from Please Please Me to Abbey Road, including Past Masters) will be released in two versions, original Mono or Stereo.

George Harrison (Actor)

Summary

 George Harrison MBE (25 February 1943 – 29 November 2001) was an English rock guitarist, singer-songwriter and film producer. He achieved international fame as lead guitarist in The Beatles, and is listed number 21 in Rolling Stone magazine's list of "The 100 Best Guitarists of All Time". Often referred to as "the quiet Beatle", Harrison embraced Indian mysticism, and helped broaden the horizons of the other Beatles as well as their Western audience. Following the band's breakup, he had a successful solo career.

Zppelin Film source: [freebase](#) (view topic)

 For the English rock group, please see Led Zppelin. For other meanings please see Zppelin (disambiguation). A Zppelin is a type of rigid airship pioneered by the German Count Ferdinand von Zppelin in the early 20th century, based on designs he had outlined in 1874, designs he had detailed in 1893, and that were reviewed by committee in 1894, which he later patented in the U.S. on March 14, ... Sémantický web vs. Web 2.0

- Sémantický web vs. Web 2.0
- ontologie vs. tagy
- sémantické wiki vs. wiki

Sémantický web – vyhlídky

- milióny stránek anotovány RSS a pomocí jednoduché ontologie FOAF
- vznikla řada ontologií – např. „Unified Medical Language System Ontology“, další seznam – http://protegewiki.stanford.edu/index.php/Protege_Ontology_Library
- workgroup W3C „Semantic Web Education and Outreach working group“ – seznam případových studií a užití sémantických technologií ve firmách – <http://www.w3.org/2001/sw/sweo/public/UseCases/>
- standard W3C „Gleaning Resource Descriptions from Dialects of Languages“ – <http://www.w3.org/TR/grddlprimer> – od mikroformátů k sémantickému webu

Závěr

- Mnoho uživatelů se možná v minulých letech domnívalo, že jedinou nadějí pro sémantické vyhledávání je sémantický web.
- Sémantický web však nevznikne přes noc. Ve skutečnosti velká část webu zůstane „nesémantická“. V současnosti již nicméně na webu existují ostrůvky sémantického webu. Je pravděpodobné, že sémantický web se uplatní nejprve ve firemních intranetech a extranetech a teprve pak ve WWW.
- Rostoucí dostupnost kvalitních sémantických dat, slibných možností sémantických technologií a potřeb uživatelů vytváří prostředí pro vznik nových firem. Důkazem jsou právě firmy jako Hakia, Powerset, Semantinet aj.
- Je jisté, že se máme i do příštích měsíců z hlediska sémantického vyhledávání nač těšit ;–)

Postzávěr

- od počátku května – Google – nové volby pro práci s výsledky:
 - časový filtr – den, týden, rok
 - řazení – relevance nebo čas
 - historická časová osa
 - související dotazy
 - „kouzelné kolečko“ – <http://www.google.com/search?q=marathon&hl=en&sa=G&tbo=1>
- Microsoft, Kumo, ... Bing!
