- Unlike for journals content, the age of book content seems not to play a very important role. Books from 2005 were used almost as frequently as books from 2006 and 2007.

- Books from 2008 were downloaded less often in 2008 since they were uploaded on SpringerLink in the course of the year and were not available for the full twelve months.

- These data are quite consistent with data we see at Google Book Search. It seems that in an 'online search environment' the age of a book is only of minor importance.

Average eBooks Chapter Downloads 2008 by Title and Copyright Year

Year	Average Downloads
2005	1445
2006	1503
2007	1811
2008	1117
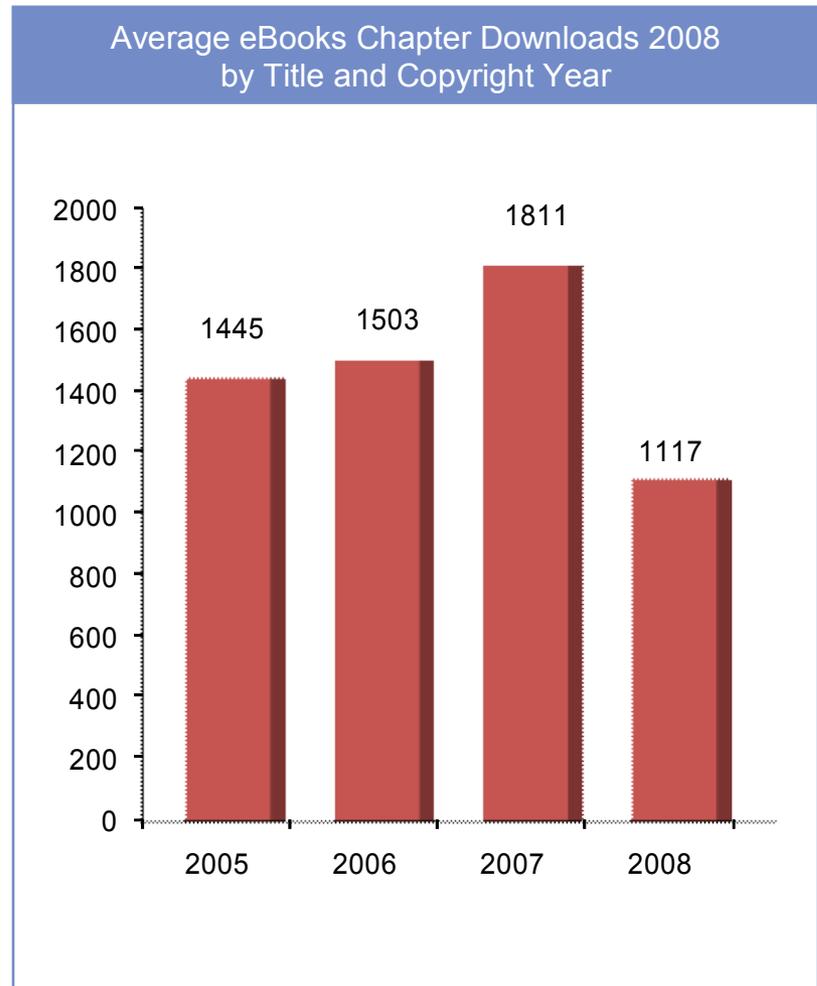

(N = 12,953)

Distribution of Usage –
usage distributed over all books

Springer: Distribution of Citations and Full-Text Downloads

- Top 20% eBooks account for 55% of total chapter downloads
- Top 10% eBooks account for 39% of total chapter downloads
